

PEOPLETOOLS 8.6 ENHANCEMENTS

PeopleTools 8.60 Enhancements

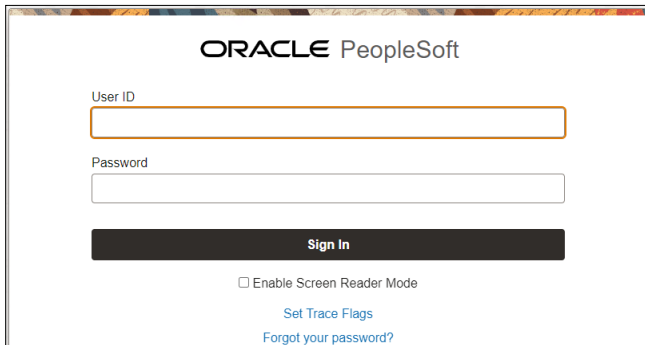

On Monday, March 25, 2024, CRIS (PeopleSoft) will be unavailable while PeopleTools 8.60 is implemented to production beginning at 4:30 p.m. and lasting all day Tuesday until completed. Please plan accordingly while the system is being updated.

Once the update is completed, End Users need to clear their internet browser cache before logging into CRIS (PeopleSoft). Please use the following link for instructions on how to clear the cache: [Clearing Cache](#)

Oracle has released PeopleTools 8.60, which provides updates to the user interface in PeopleSoft. The updates, highlighted below, provide an explanation of the changes to the system. Please take a moment to familiarize yourself with the upcoming changes.

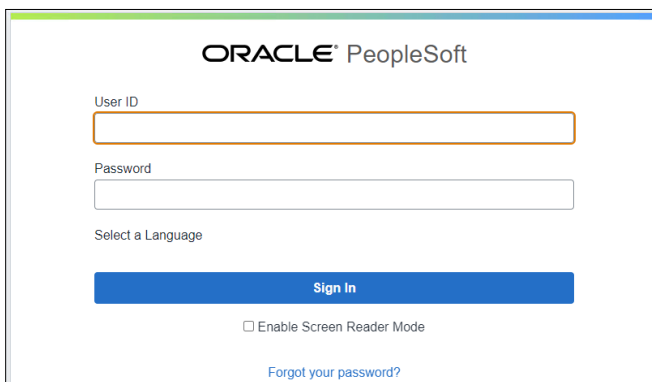

Overview of Enhancements

- Updates look with the Redwood Color Scheme
 - New:

The screenshot shows the Oracle PeopleSoft login page with the Redwood color scheme. It features a white background with orange and black accents. The 'Sign In' button is black with white text. Below the button are links for 'Enable Screen Reader Mode', 'Set Trace Flags', and 'Forgot your password?'.

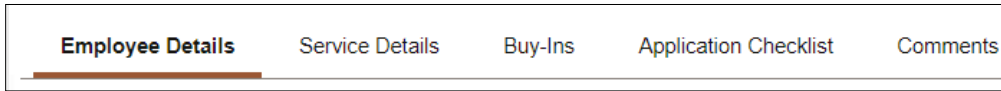

- Currently:

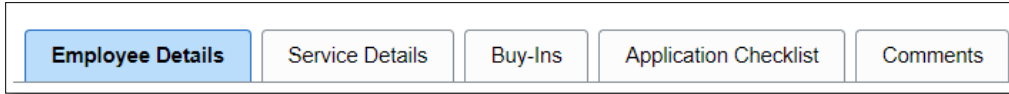

The screenshot shows the current Oracle PeopleSoft login page. It features a white background with a blue header bar. The 'Sign In' button is blue with white text. Below the button are links for 'Enable Screen Reader Mode' and 'Forgot your password?'.

- Tabs

- New: Tabs no longer display. The “tab” you are on is now underlined in red.

- Currently: Displays tabs, with the blue tab, reflecting the page being viewed

- Banner

- New: The back button is now displayed with an arrow

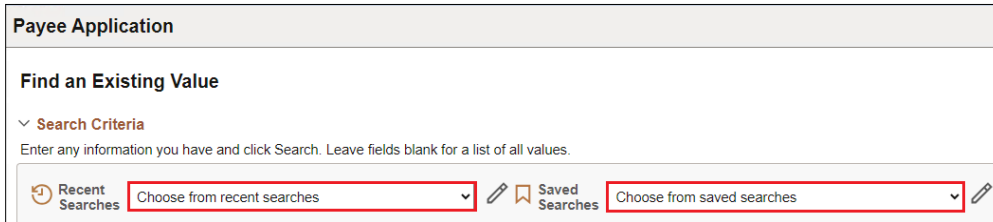

- Currently: The back button is displayed with a partial arrow

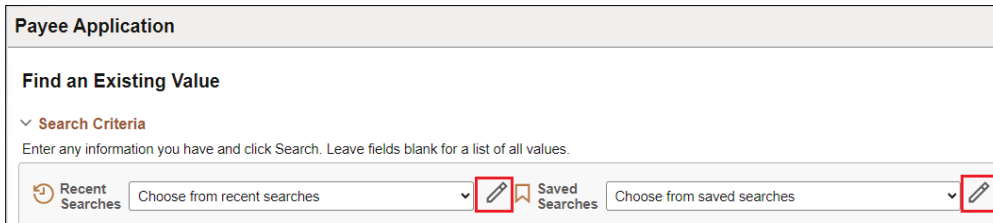

- Recent/Saved Searches Feature

- New: Recent Searches and Saved Searches will display your recent/saved searches when you click the drop-down menu.

- Save and modify your recent/saved searches by clicking the pencil

Please contact the ERP Functional Services section with any questions.
